SECTION 12: HEALTH HAZARD INFORMATION

The specific components of this product constitute a trade secret. Listed below are components reported in tests with laboratory animals to have hazardous properties other than (1) combustibility or flammability or (2) eye and skin irritation from excessive contact. Both of these hazards are addressed elsewhere on this data sheet. The relevancy of animal test date on these components to the mixture as a whole or to humans has not been established.

Note that these possible effects in test animals were reported for continual overexposure to components of this mixture. Many of the substances having such effects are natural components of common foods and are not known to be harmful in normal use.
